UNDERSTANDING FIT, MATCH, AND COST

Prior to submitting a college application, you need to research the various college options you have available. During your research, there are three important things to consider: **fit**, **match**, and **cost**. Use the information and resources within this document to help research and identify the colleges to which you want to apply.

**DOES THE COLLEGE FIT WITH YOUR PREFERENCES?**

There are several factors to consider with regard to fit such as the size of the school, the location of the school, services available on campus, and how these align with the characteristics you want in a college. Also, it is important to consider the college’s graduation rates and retention rates (the number of students who return to school for their second year) when researching what a college has to offer you. Finally, does the school offer your major?

If you’re not sure what you’d like to major in, there are a number of college and career planning resources your school may already be using. Ask your school counselor if they have a preferred tool. If not, Encourage is the nation’s largest free college and career planning program. The Encourage app ([encourageme.com](http://encourageme.com)) for students is available online, iOS and Android. Explore college and scholarship matches, learn about careers, set goals, and track your progress with Encourage.
DOES THE COLLEGE MATCH WITH YOUR ACADEMIC RECORD?

For this, you'll need to understand how your high school grade point average (GPA), your college entrance exam scores (SAT and/or ACT), and the courses you've taken in high school match to the college’s entrance requirements AND to the average GPAs and scores of students admitted. Keep in mind that what a school requires could be different from the averages of who they admit. You should plan to apply to at least four schools, making sure you have applications going to each of the following types of schools:

- **REACH SCHOOL** – a reach school does not mean out of reach, it just means that the school may be more selective (look at the percent of applicants admitted) and your academic record may be on the lower end of what the college typically accepts. In other words, you may be admitted to this school. We recommend at least 1-2 applications to reach schools.

- **TARGET SCHOOL** – typically, at a target school, your academic record will be similar to the “average” student admitted to this school. In other words, you are likely to be admitted. We recommend at least 2 applications to target schools.

- **LIKELY SCHOOL** – a likely school will usually have either open enrollment (meaning anyone who submits a completed application is admitted) or will be considered a “less selective” institution. Your academic record will exceed the institution’s requirements and averages for students admitted. In other words, you will almost definitely be admitted. We recommend at least 1 application to a likely school.

- **LOCAL SCHOOL** – ensure that at least one of the schools on your list is local to you. If possible, this should be a school you can attend while living at or close to home in the event your circumstances require you to do so now or in the future.

WHAT ABOUT COST?

Finally, it is important for you to understand the cost of the institutions to which you would like to apply. Keep in mind that the “sticker” price of a college may be very different from the “net” price of a college after you consider the amount of aid that is typically available to students.

Check out these net price calculators to help you calculate your cost or check if the colleges you are interested in have a similar calculator.

- **College Board’s Big Future**: [https://bigfuture.collegeboard.org/pay-for-college/paying-your-share/focus-on-net-price-not-sticker-price](https://bigfuture.collegeboard.org/pay-for-college/paying-your-share/focus-on-net-price-not-sticker-price)
Use the worksheet on the next few pages to think through what type of college you would like to attend. The worksheet will also ask you to detail your academic record by providing information on the various academic indicators that many colleges consider during the application review process. If you are unsure of any of the information requested, be sure to work with your school counselor so you have the most accurate information possible.

After the worksheet, you will find a table that you can complete with information specific to the colleges you are researching. Remember, you should plan to apply to at least one to two reach, one to two target, one likely, and one local college.

Students can utilize the following national resources, your state’s college website, or the website of the college(s) you are interested in learning more about to conduct your research.

☐ Electives
COLLEGE MATCH AND FIT TABLE

Instructions: Use one of the college research resources outlined on page 4 of this document to search for colleges that “fit” and “match”. Or, search for a specific college to which you think you would like to apply to learn more about them. For each college, complete this table to determine if the college is a good fit and match for you and whether the costs seem reasonable based on your anticipated resources.
